Swamped!

Move (in place) like you are walking and you stumble into a swamp. Your shoes fill with water and your socks are squishy and wet. You slowly lift your legs but each step your feet are sinking deeper and deeper. Reach up and grab a tree branch. Slowly pull yourself up onto the dry land. Run away before you slip again!

Creaking Floors

Move (in place) like you are opening the door of a haunted house. You struggle to push open the heavy door. Shuffle your feet nervously across the dusty floor. Pull away the cobwebs on the staircase. Each stair creaks as you slowly climb to the top. What was that sound? Look left! Look right! Run back down the stairs! Slam the front door!

Mad Scientist

Decide on a sneaky, secret handshake. Choose one person to be the mad scientist. Have everyone walk around the room shaking hands. If the mad scientist gives you the secret handshake, you turn into a (silent) Frankenstein. The mad scientist continues turning students into monsters until someone figures out who it is.
